

# WE'LL BE WITH YOU FOR THE LONGHAUL.

## **MONO™ LONGHAUL™ PACKAGE**

The robust, effective, long distance water solution.

[monopumps.com.au](http://monopumps.com.au)

# DELIVER WATER EASILY TO YOUR STOCK, WHEREVER THEY MAY BE.

The Mono™ Longhaul™ package offers brilliant suction, meaning distance may no longer be a problem. Pump to 240m total discharge head from source – whether it's a dam, river or water tank – and achieve peak performance with automatic controls working around the clock.

The reliable and robust Longhaul package uses single phase power to deliver the goods, saving on costly transformer upgrades.

## Features

The Longhaul is a fully motorised package that will efficiently and reliably pump water through kilometres of piping. The complete package includes a controller, dry-run prevention and over-pressure prevention.

Mono's Longhaul pump is proven technology – it's been used for more than 10 years in some of the harshest environments around the world. The Longhaul can be used with dam water, shallow wells and creek water. A versatile unit, it can also work well for domestic water supply, small scale irrigation and sprinklers as well as surface water transfer.

The Longhaul is designed and manufactured in Australia. Sustainability and environmental protection features are in-built, without compromising value for money.

<b>Motor</b>	4.0 kW 220 VAC
<b>Capacity</b>	Up to 5 m <sup>3</sup> /hr (1100 gph)
<b>Pressure</b>	Up to 240 metres (347 psi)
<b>Temperature</b>	10°C – 40°C *

\* Higher temperature rating available.

## Benefits

### PLACE WATER DIRECTLY WHERE STOCK GRAZE

Taking water to stock increases their time available to graze and reduces the environmental damage at watering points.

### RELIABILITY WITH LESS SERVICING

A stainless steel, wear-resistant rotor with hard chrome plating and stainless-steel shaft leads to a corrosion-free and long life. With only a single moving part, costly servicing is avoided.

### LOW RUNNING COSTS

Highly efficient and cost-effective.

### IDEAL FOR LONG DISTANCE PUMPING

Consistent flow and pressure designed to move water long distances.

### FULL AUTOMATION REDUCES HASSLE, SAVES TIME

Efficient water use is combined with simple and effective dry-run and overpressure prevention.

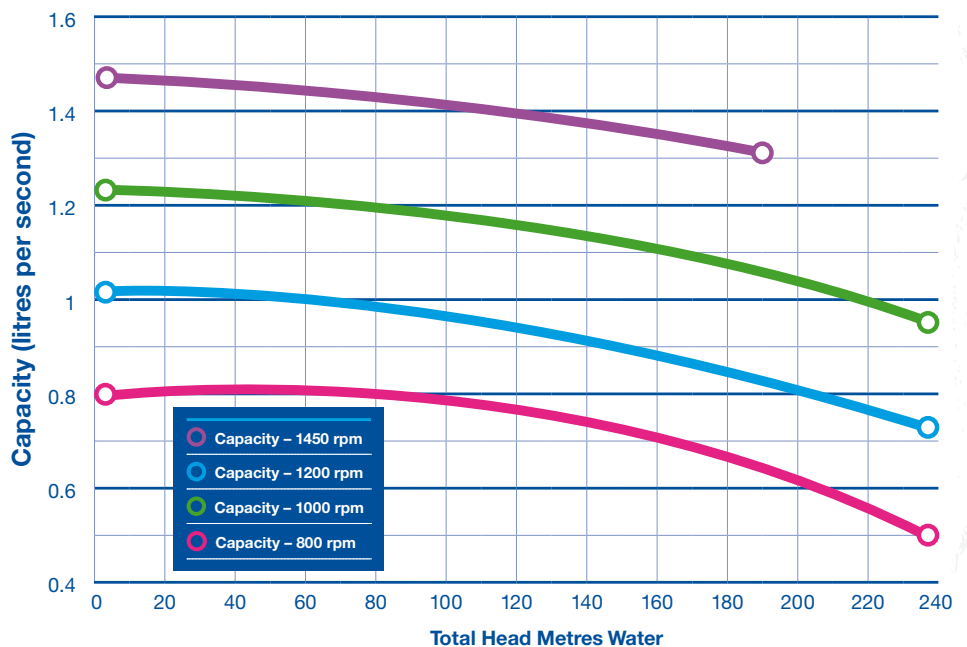

### THRIVES INTOUGH CONDITIONS

Designed and made in Australia for extreme conditions by Mono, a company with more than 75 years of experience in the agricultural industry.

### NATIONAL SUPPORT

Mono's extensive dealer network is on hand to help with any installation or servicing needs.

## Performance data

Whilst all reasonable care has been taken to ensure the accuracy of the provided information, pump performance can and will vary depending on actual operating conditions (product consistency, temperature, and pressure losses). The information provided should be used as a guide only and in light of Mono's aim towards ongoing product development, specifications and performances are subject to change without notice.
